

## Statewide Accredited Centers and Family Home Providers

*Revised 10-08*

Achieving national accreditation represents the mark of quality in early childhood education. Accreditation gives programs the chance to be measured against high standards in the areas of education, health, and safety. Accreditation is a voluntary process that gives programs the opportunity to evaluate what they do well and identify areas of improvement. Through the process of accreditation; staff, administration, and families become a stronger team as they continue to improve quality.

Congratulations to the following centers and family home providers on becoming nationally accredited!
